DIRECTOR GENERAL'S MESSAGE

Happy to meet you with this year's second issue of the quarterly bulletin. This period has witnessed historical events of re-organization of DGMS from 29 regions to 38 regions causing ease in functioning. Two officers were promoted to the DDG (Mining) post and the much-awaited promotions of 21 Deputy Directors (Mining) to Director (Mining) have been accorded in this period. My heartiest congratulations to all the promotes and I wish them all the success in their new roles.

I also take this opportunity to bring your attention on the importance of workers participation in safety management and the role of the mine levels safety committees.

There is no iota of doubt that the worker's participation in occupational health and safety (OH&S) management is superior to the unilateral management approaches. Since the coining of the concept in the first National Safety Conference (NSC) held in 1958, it has been regularly strengthened through recommendations of the subsequent NSCs and this Directorate's Technical Circulars. Further, the statutory backup exists through the Section 58(cc) of the Mines Act, 1952 and Rules 29T, 29U, 29V and 29W of the Mines Rules, 1955.

Workmen's Inspectors (WI) are the backbone to the safety of the mine. Adequate training to them and letting them work independently two days in a week regularly and management's proper action on the entries made in the Form -U are required to be given more thrust by us.

In view of the importance of the workers participation in the OH&S management of mines, I request you to pay your attention on compliance of the above-mentioned provisions and the relevant recommendations of the eighth and ninth NSCs during your inspections of the mines.

I am confident that with our ever-improved efforts in administering and facilitating, we contribute to the health, safety, and well-being of common miner.

With best regards.

(Prabhat Kumar)

No.DGMS(Tech) Circular(OH)/ 01

Dhanbad, dated 24.04.2023

To

The Owner, Agent and Manager of all Mines

Subject: Accidents/incidents due to exposure to high temperature

Sir/Madam,

1. During peak summer every year, many incidences of mine workers getting affected due to exposure to high atmospheric temperature get reported. Some such cases had even turned into fatalities. Opencast mines during summer are most vulnerable in this regard. In some cases, persons get affected due to heat in underground mines also, mostly due to inadequate ventilation. Inquiries revealed that in most of the cases "Heat stroke" was the major contributory cause. Hence, the mine management shall educate all the field officers, supervisors and workmen on the illnesses due to exposure to high atmospheric temperature, so that they can take necessary precautions and also render proper first-aid without delay.

2. Physiological effects of working in high atmospheric temperature:

Sweating, which is the release of fluid through sweat glands in the skin, helps release heat, but it must evaporate in order to cool the body. While working in high atmospheric temperature, a person's body is restricted from releasing heat from the body to the atmosphere. As a result, heavy sweating takes place, which results into loss of mineral salt along with fluid from the body. Heat-related illnesses, each of which can occur alone or in combination with others, are generally classified and handled as follows:

- i. **Heat rash** is in the form of tiny red blisters usually on the areas of more sweating like neck and upper chest, in the groin, under the breasts, and in elbow creases. It is caused due to continuous presence of unevaporated sweat. Regularly washing and drying the skin are the important precautions from it. In case formation of blisters takes place, care should be taken, not to burst them.
- ii. **Sun-burn** is the damage to the skin, mostly the superficial layer (Epidermis), causing the skin to be purplish. The person suffering from it, feel hot and feverish. In more severe cases, fluid-filled blisters form which can get infected. Application of cold compresses to the sunburned areas, gives some relief. The suffering person also can be given cool sponging. In case, formation of blisters takes place, care should be taken, not to burst them, to avoid skin infection.
- iii. **Heat fatigue** is indicated in a person with impaired and inadequate performance in jobs that require skill involving adeptness in neuro-muscular activities as well as good judgment and vigilance. In all such cases, the affected person shall be taken to a cooler place and shall be kept there till his recovery.

- iv. **Heat cramps** are severe muscle pains along with spasms; generally take place in the abdomen, arms, or legs. Cramps often affect people who sweat a lot during strenuous activity. They can be caused by both too much and too little salt consumption, resulting into electrolyte imbalance in the body. In such condition, affected persons to be given lightly salted water (1/4 tablespoon of table salt per quart of water) or a beverage that replaces lost electrolytes. If the cramps don't subside in about one hour or the person is on a low-sodium diet or has a history of heart problems, medical attention to be sought without delay.
- v. **Heat syncope** (fainting due to heat) occurs when the adequate quantity of blood fails to reach the brain due to movement of more blood towards the skin for throwing off the body heat into the atmosphere. In hot atmosphere more fluid is also lost in the form of sweat, resulting less quantity of body fluid available to the heart for pumping to the Brain. Under such scenario, brain is unable to function properly, in absence of adequate nutrient and Oxygen, causing giddiness, nausea and sudden collapse. The facial skin also becomes pale in most cases. In such situation the affected person shall be immediately taken to a cooler place and if the person is at least in semi-conscious state, he can be given water (or a clear juice or sports beverage) slowly. If the person is totally unconscious, medical attention to be sought immediately.
- vi. **Heat exhaustion (dehydration)** occurs when a person fails to replenish enough fluid and minerals in the body due to excessive sweating, resulting into electrolyte imbalance. Inadequate electrolyte in the body causes disturbance in the brain causing symptoms like headache, nausea, vertigo, weakness, thirst, palpitation and muscle cramps. The victim's skin becomes moist, the complexion pale or flushed. Left untreated, Heat exhaustion can lead to Heat Syncope or even Heat stroke. It is vital that the affected person drinks lots of lightly salted water (1/4 tablespoon of table salt per quart of water) or a beverage that replaces electrolytes. Plenty of rest away from heat is also important. In severe cases the affected person may require medical advice as well.
- vii. **Heat stroke** (sun stroke) is the most serious amongst all heat-induced illness. It's caused by fatigue of body cooling mechanism and lack of sweating due to continuous exposure to high atmospheric temperature, resulting into an accelerating rise of body temperature. In such condition Brain as well as all other vital organs of the body unable to function normally. Symptoms include throbbing headache, confusion, hallucinations, slurred speech, convulsions, fainting and coma. The skin becomes hot and dry, the pulse becomes rapid, and blood pressure low. Body temperature can soar up to 106°F (41°C) or more. Heat stroke can cause irreversible damage to the body and is life threatening. This condition can be fatal unless rapid and adequate treatment is obtained. After removing the victim to a cooler area, immediately cooling of the skin to be facilitated by loosening the clothing, spraying with cool water and a fan, or body sponging with chilled water. Medical attention to be sought without any delay while attempting to cool down the body of the affected person.

3. Dealing with exposure to the environments of high temperature issues in mines

Problems due to exposure to high surrounding temperature can be reduced in mines by adopting proper engineering measures, suitable work practices and use of proper Personal protective equipment including clothing.

A. Engineering measures:

- a. Rest shelters shall be provided at all the locations, within a reasonable distance from the places where persons have to work directly under the sun. As far as practicable, the temperature in the Rest shelter should be maintained below 25°C.
- b. To provide cool drinking water to the employees at 10 to 15°C.
- c. Proper mine ventilation to be provided for supplying cool air to the work place or air-conditioning of the work place, in case natural cool air is not available.
- d. Covered drainage or insulated piping for a speedy transfer of hot water to the surface, in order to control the problem of hot ground water heating up the underground mine environment.

B. Administering suitable work practices: When Engineering measures alone fail to prevent workers from suffering from heat stress, a combination of engineering measures and following work practices shall be adopted:

- a. To take frequent breaks and reasonably short work periods.
- b. To perform heavy tasks in cooler areas or at a time, when atmospheric temperature is reasonably low
- c. To adopt job rotation for personnel exposed to high atmospheric temperature.
- d. To encourage all employees to drink a cup of water every 15 to 20 minutes and to drink lightly salted water.
- e. To encourage to take extra salt at meals as per the health condition of the employees.
- f. To increase awareness on effects of consuming drinks with caffeine, alcohol and excess sugar.

C. Personal Protective Equipment and clothing: Clothing worn in hot conditions should ideally be made of cotton and not too tight. Loose clothes; on the other hand, puts the wearer at risk of being caught/pulled into moving parts of machinery. Most of the reflective clothing does not allow air exchange through them; hence reflective clothing should be worn as loosely as practicable. During mines rescue operations, personal protective equipment and self-contained breathing apparatus should not be worn continuously for more than two hours.

4. Conclusion

Working in environments with high-temperature causes several other illnesses varying from heat Rashes to heat stress. The symptoms include confusion, hallucinations, chills, throbbing headache, and loss of consciousness, convulsions, slurred speech, and coma. These illnesses are also manifested as frustration, rage, and other emotions that might lead to hasty, short-cut unsafe acts and risky behaviour.

The above guidelines are helpful to address the issues related to extreme to high temperatures.

Therefore, the mine management shall take the suitable measures to deal with the situation and to prevent the persons working in mines from getting exposed to high atmospheric temperature, which have an adverse effect on health.

Yours faithfully,

(Prabhat Kumar)

मध्य जोन का अधिकार क्षेत्र बिहार राज्य और झारखंड राज्य के हिस्से में है, जिसका मुख्यालय धनबाद (झारखंड) होगा तथा इसके साथ धनबाद क्षेत्र-1, धनबाद क्षेत्र-2, धनबाद क्षेत्र-3 तथा कोडरमा क्षेत्र समाविष्ट होंगे।

धनबाद क्षेत्र-1, मुख्यालय धनबाद, राज्य झारखंड

झारखंड राज्य का भाग: धनबाद जिले की सभी खदानें जो गिरिडीह-टुंडी-गोविंदपुर रोड के पश्चिम और NH-32 के उत्तर में गोविंदपुर-धनबाद से बोकारो तक स्थित हैं।

धनबाद क्षेत्र-2, मुख्यालय धनबाद, राज्य झारखंड

झारखंड राज्य का भाग: धनबाद जिले की सभी खदानें गिरिडीह-टुंडी-गोविंदपुर रोड के पूर्व में और NH-32 के दक्षिण में गोविंदपुर-धनबाद से बोकारो तक स्थित हैं।

धनबाद क्षेत्र-3, मुख्यालय धनबाद, राज्य झारखंड

झारखंड राज्य का भाग: जामताड़ा, देवघर, दुमका, पाकुड़, गोड्डा और साहेबगंज जिले की सभी खदानें।

कोडरमा क्षेत्र मुख्यालय, कोडरमा, राज्य झारखंड

बिहार राज्य एवं झारखंड राज्य का भाग: बिहार राज्य की सभी खदानें और झारखंड राज्य के कोडरमा, गिरिडीह और बोकारो जिलों की सभी खदानें।

पूर्वी जोन का अधिकार क्षेत्र पश्चिम बंगाल, असम, सिक्किम, अरुणाचल प्रदेश, मणिपुर, मेघालय, मिज़ोरम, नागालैंड और त्रिपुरा राज्य और अंडमान और निकोबार केंद्र शासित प्रदेश के हिस्से में है, जिसका मुख्यालय सितारामपुर (पश्चिम बंगाल) होगा तथा इसके साथ सितारामपुर क्षेत्र-1, सितारामपुर क्षेत्र-2, सितारामपुर क्षेत्र-3 तथा गुवाहाटी क्षेत्र समाविष्ट होंगे।

सितारामपुर क्षेत्र-1, मुख्यालय सितारामपुर, राज्य पश्चिम बंगाल

पश्चिम बंगाल राज्य का भाग: पश्चिम बर्धमान जिले की सभी खदानें जो एनएच-2 (NH-2) के दक्षिण में स्थित हैं। पुरलिया, बांकुरा, झारग्राम, पश्चिम मेदिनीपुर और पूर्वी मेदिनीपुर जिलों की सभी खदानें।

अंडमान और निकोबार केंद्र सभी खदानें।

शासित प्रदेश:

सितारामपुर क्षेत्र-2, मुख्यालय सितारामपुर, राज्य पश्चिम बंगाल

पश्चिम बंगाल राज्य का भाग: पश्चिम बर्धमान जिले की सभी खदानें जो एनएच-2 (NH-2) के उत्तर में और एनएच-60 के पूर्व में एनएच-2 पर पंजाबी मोड़ से पांडवेश्वर घाट तक स्थित हैं। पूर्व बर्दवान, मुर्शिदाबाद, नदिया, उत्तर-24-परगना, दक्षिण-24-परगना, हावड़ा, हुगली, कोलकाता, मालदा, दक्षिण दिनाजपुर, उत्तर दिनाजपुर, दार्जिलिंग, जलपाईगुड़ी, अलीपुरद्वार, कूचबिहार और कालिम्पोंग जिलों की सभी खदानें।

सितारामपुर क्षेत्र-3, मुख्यालय सितारामपुर, राज्य पश्चिम बंगाल

पश्चिम बंगाल राज्य का भाग: पश्चिम बर्धमान जिले की सभी खदानें जो एनएच-2 (NH-2) के उत्तर में और एनएच-60 के पश्चिम में एनएच-2 पर पंजाबी मोड़ से पांडवेश्वर घाट तक स्थित हैं। तथा बीरभूम जिले की सभी खदानें।

गुवाहाटी क्षेत्र, मुख्यालय गुवाहाटी, राज्य असम

असम, सिक्किम, अरुणाचल सभी खदानें।
 प्रदेश, मणिपुर, मेघालय,
 मिज़ोरम, नागालैंड और त्रिपुरा
 राज्य:

दक्षिण-पूर्वी जोन का अधिकार क्षेत्र झारखंड राज्य और ओड़ीशा राज्य के हिस्से में है जिसका मुख्यालय राँची (झारखंड) होगा तथा इसके साथ राँची क्षेत्र, चाईबासा क्षेत्र, भुवनेश्वर क्षेत्र-1 तथा भुवनेश्वर क्षेत्र-2 समाविष्ट होंगे।

राँची क्षेत्र, मुख्यालय राँची, राज्य झारखंड

झारखंड राज्य का भाग: राँची, रामगढ़, हजारीबाग, चतरा, पलामू और गढ़वा जिले की सभी खदानें।

चाईबासा क्षेत्र, मुख्यालय चाईबासा, राज्य झारखंड

झारखंड राज्य का भाग: ईस्ट सिंहभूम, वेस्ट सिंहभूम, सराईकेला-खरसावाँ, लातेहार, लोहरदगा, गुमला, खूंटी और सिमडेगा जिले के सभी खदानें।

भुवनेश्वर क्षेत्र-1, मुख्यालय भुवनेश्वर, राज्य ओड़ीशा

ओड़ीशा राज्य का भाग: अंगुल, डेंकानाल, जाजपुर, क्यौंझर, भद्रक बालासोर (बालेश्वर), केन्द्रापड़ा, जगतसिंहपुर, कटक, खुर्दा, पुरी, नयागढ़, गंजाम, गजपति और मयूरभंज जिले की सभी खदानें।

भुवनेश्वर क्षेत्र-2, मुख्यालय भुवनेश्वर, राज्य ओड़ीशा

ओड़ीशा राज्य का भाग: सुंदरगढ़, झारसुगड़ा, संबलपुर, देवगढ़, बौध, बारगढ़, सुबर्नपुर (सोनपुर), नुवापाड़ा, बलांगीर, कंधमाल (फूलबनी), रायगड़ा, कालाहांडी, नबरंगपुर, कोरापुट और मलकानगिरि जिले की सभी खदानें।

स्वतंत्रता के 75वें वर्षगांठ पर...

“ आज हमने जो पाया हैं

आज हमने जो पाया हैं, मत भूलो बहुत गवाया हैं ।
वीरों ने हँसते हँसते लहू बहाया हैं, और सब दाव पर लगाया हैं,
कुछ लेट गए मृत्यु शय्या पर, कुछ ने जख्म खाया हैं,
ये उनके साहस का परचम लहराया हैं, जो आज हमने स्वतंत्रता ध्वज फहराया हैं ।
आज हमने जो पाया हैं, मत भूलो बहुत गवाया हैं , मत भूलो बहुत गवाया हैं ॥

माओं ने बेटा खोया हैं, विरंगनाओं ने श्रंगार धोया हैं,
पिताओं ने साहस बँधाया हैं और सपूतों को चिताओं पर सुलाया हैं,
ये उनके बलिदानों का साया हैं, जो आज हम पर आजादी की छाया हैं ।
आज हमने जो पाया हैं, मत भूलो बहुत गवाया हैं , मत भूलो बहुत गवाया हैं ॥

वीरों के उत्सर्गों की महिमा बखाने का वक़्त आया हैं, सोतो को जगाने का वक़्त आया हैं,
कर्तव्य पथ पर डट जाने का , भेद भाव मिटाने का और अपने “भारत” को सोने की चिड़िया
बनाने का अवसर हमने पाया हैं ।

आज हमने जो पाया हैं, मत भूलो बहुत गवाया हैं
जो आज हमने स्वतंत्रता दिवस मनाया हैं, मत भूलो बहुत गवाया है, तब जाकर ये सुनहरा
पल आया हैं ॥

..... Happy Independence Day.....pkj
